

Company Profile

Universal Industrial Gases designs, supplies and constructs air separation plants which produce nitrogen, oxygen, and argon as gases and cryogenic liquids. UIG also supplies gas and liquid products directly to end users from UIG owned and operated facilities installed at customer sites. Onsite production not only minimizes total delivered product costs, but also maximizes supply reliability. UIG can meet customer needs with all-new plants or relocated and upgraded equipment.

<p>Oxygen and Nitrogen Production</p>	<p>Refinery On-site Supply</p>	<p>Bulk Liquid Products + Onsite Supply</p>

Products and Services:

Cryogenic Air Separation Plants: To produce nitrogen, oxygen and argon as gases and/ or liquids

Other Cryogenic Liquid Producing Plants: To recover, purify and liquefy primary and secondary products from chemical plants, refineries and natural gas processing activities.

Design, Installation, Startup, and ongoing Operations and Maintenance Services

Sale of Gases and Liquids: On-site production and supply of nitrogen, oxygen, argon, compressed air, and other gas and liquid products for plant utility, process feed, and fuel applications.

Industries Served:

Refining and Petrochemicals: Oxygen for controlled and enhanced combustion and environmental uses. Nitrogen for purging lines and maintenance of inert atmospheres.

Natural Gas Producers and Oil and Gas Field Service Operators: Liquid nitrogen for fracking of tight gas formations, pressurization, and advanced recovery applications.

General Industry: Large volume users of oxygen and nitrogen.

Change is in the Air

Need a new approach to your industrial gases?

UIG is making a difference in industrial gas and equipment supply:

- We create low cost systems designed just for you
- We offer simple, flexible contracts on your terms
- We produce nitrogen, oxygen, and argon as gases and cryogenic liquids where you want them, when you want them
- We show you how to own, operate and maintain your supply system

Leading edge companies work with us. **UIG** has supplied air separation plants and equipment to major industrial gas companies and to chemical producers, refiners, steelmakers and other industries, worldwide.

First we consult with you on the best answer for your needs.

Second we provide top quality system design, procurement, project management, turnkey installation, commissioning, startup support, and downstream operations support.

Third, we never forget you are our customer. We are independent, adaptable, service oriented, and always ready to do whatever it takes to achieve your goals.

So, do you need a new approach to your industrial gases?
